---

## Summary of Qualifications

- Front-End Developer skilled in responsive design with HTML, CSS, JS, and ReactJs
  - Familiar with backend development and have built my own Node servers using Express
  - Proficient and knowledgeable of technical SEO and SEO best practices.
  - Enjoy solving problems and finding optimal solutions
- 

## Experience

**NFT Collector Web App** (<https://nft-collector.herokuapp.com/>)

- Full stack application built with vanilla javascript on the front end and express on the backend.
- Utilizes the CRUD operations dynamically executed by performing HTTP requests asynchronously to the server on different events.
- Includes its own User Authentication with HTTP requests.
- Encrypts data to keep information secure.

**Github Repo :** (<https://github.com/ssama8/NFT-Collector>)

**Sporting Goods Ecommerce App** (<https://samas-sporting-goods-store.netlify.app/>)

- Front-End Ecommerce application built with React. This app receives data from an API, (built with Netlify serverless functions) and stores the data as products
- Uses Context and Reducer to pass the state down the component tree and dispatches actions on certain events to update the state.
- Includes User Authentication using Auth0 and connected to Stripe as a payment processor.

**Github Repo:** (<https://github.com/ssama8/react-ecommerce-project>)

**Gerd Solutions Wordpress Blog** (<https://gerdsolutions.com/>)

- Wordpress blog that is SEO optimized using plugins like Yoast SEO.
- Keyword and lateral keyword rich articles based on keyword research using tools like SemRush and ScreamingFrog.
- Connected to external email service, Aweber, as well as Google Analytics and Google Search Console to track KPIs.
